#### INTRODUCTION & CONSENT

Hello, my name ..... and I am from Policy Link. We are here conducting a study with the community and institution working in Jur River county. The purpose of this survey is to **support institutions and communities** to identify ways you can work with other institutions **to help improve the response to shocks** such as conflict, drought, disease outbreak, and flooding. In this survey, we will ask you about your institution, its capacities for responding to shocks, and your institution's relationships with other institutions and the local communities.

This survey employs a resilience approach. A resilience approach helps identify ways to integrate humanitarian relief and development assistance. Specifically, a resilience approach can help identify ways to reduce vulnerability to shocks and lay the foundation for longer-term development.

For the duration of this survey, you will be answering the following questions **on behalf of your institution**. Your name and demographic data will be **anonymized** in accordance with the South Sudan Laws of confidentiality.

The survey will take approximately one hour For any questions, please contact Eruaga Jackson at [eruaga\\_jackson@dai.com](mailto:eruaga_jackson@dai.com) and Jeffrey Campbell at [jeffrey\\_campbell@dai.com](mailto:jeffrey_campbell@dai.com)
