

COMMUNITY RESILIENCE MAPPING TOOL

HOUSEHOLD QUESTIONNAIRE

HOUSEHOLD IDENTIFICATION

INTRODUCTION & CONSENT

The purpose of this survey is to support you and your community to identify ways you can work with institutions to help improve the response to shocks such as conflict, drought, disease outbreak, and flooding. In this survey, we will ask you about your household, institution, its capacities for responding to shocks, and your relationships with other institutions and local communities.

This survey employs a resilience approach. A resilience approach helps identify ways to integrate humanitarian relief and development assistance. Specifically, a resilience approach can help identify ways to reduce vulnerability to shocks and lay the foundation for longer-term development.

For the duration of this survey, you will be answering the following questions on behalf of your household. Your name and demographic data will be anonymized in accordance with the South Sudan Laws of confidentiality.

The survey will take approximately slightly more than one hour.

For any questions, please contact Eruaga Jackson at Eruaga.Jackson@dai.com and Jeffrey Campbell at jeffrey_campbell@dai.com
